

EU Taxonomy Reporting Assessment

SUBJECT

Ahenobarbus Recruitment

REFERENCE

CENS-2026-37576

DATE OF ISSUE

9 August 2026

CRITERIA BASIS

Delegated Acts as amended, in force July 2026

INFORMATION REVIEWED

- Description provided by user. All 242 listed activities were searched.
- No listed EU Taxonomy activity matched the described business.

SUMMARY OF ELIGIBILITY

ACTIVITY	ELIGIBILITY	MATCH CONFIDENCE
Eligibility	Not eligible	

SCALE ● Eligible ● Not eligible

Eligibility is not alignment. Eligible means the activity is listed in the EU Taxonomy and in scope; it says nothing about whether the activity meets the criteria. Whether it is actually aligned (Substantial Contribution, Do No Significant Harm, Minimum Social Safeguards) is established by a full assessment. Match confidence reflects how confidently the description maps to this Taxonomy activity, not the strength of any evidence. The difference is explained at censatim.com/eutaxonomy.

ASSESSMENT OPINION

No matching EU Taxonomy activity was identified for the described business. The EU Taxonomy is a classification of specific, climate-relevant economic activities; it does not cover every business, and falling outside it is a scoping outcome, not a judgement on environmental performance. Activities outside the Taxonomy have no eligibility or alignment to report: for reporting purposes they are simply non-eligible.

Identification is sensitive to how an activity is described. If you believe the business should match a listed activity, add more operational detail (the core activity, its sector, and what it produces or serves) and run the check again.

Eligibility is determined from the description provided; it confirms the activity is in scope of the EU Taxonomy, not that it is aligned. Evidence is gathered, and alignment is assessed per criterion, at the full assessment stage. See censatim.com/eutaxonomy for the difference between eligibility and alignment.

This does not constitute a formal opinion and is not a substitute for full verification.

EU Taxonomy Reporting Assessment

METHODOLOGY

This assessment maps the entity's stated business areas to the economic activities defined under the EU Taxonomy (Regulation (EU) 2020/852) and its Delegated Acts. Each identified business area is assessed first for eligibility, then, where in scope, against the applicable Substantial Contribution and Do No Significant Harm criteria, with reference to the generic appendices where invoked. Alignment findings are expressed per business area and per environmental objective. Censatim does not calculate or report financial figures; the mapping is provided to enable the entity to allocate turnover, capital expenditure, and operating expenditure itself.

ELIGIBILITY SCALE

Eligible

The activity is listed in the EU Taxonomy and in scope. This says nothing about whether the activity meets the criteria.

Not eligible

The described activity does not correspond to an activity listed in the EU Taxonomy.

Eligibility is not alignment. Whether an eligible activity is actually aligned (Substantial Contribution, Do No Significant Harm, Minimum Social Safeguards) is established by a full assessment. Match confidence reflects how confidently the description maps to the identified Taxonomy activity, not the strength of any evidence: High means a clear match, Moderate a reasonable match with plausible alternatives, Low an indicative match needing more detail. The difference between eligibility and alignment is explained at censatim.com/eutaxonomy.

ASSUMPTIONS

- Information provided by the user is taken at face value and has not been independently verified or audited.
- Where required data was not provided, the relevant criterion is marked as undetermined rather than assumed to be met or unmet.
- The assessment reflects the EU Taxonomy Delegated Acts in force at the date of issue; subsequent amendments are not retrospectively applied.
- Qualitative criteria requiring specialist judgement may be flagged for expert review rather than concluded automatically.
- Each issued report is stored under its reference and can be retrieved as issued. Reports are AI-assisted: wording may vary if identical inputs were re-run; the criteria applied remain those stated under Criteria basis.

DISCLAIMER

This document is an AI-assisted analysis referenced against the EU Taxonomy Delegated Acts. It does not constitute professional regulatory advice, a formal audit opinion, legal advice, or a guarantee of regulatory compliance, and should not be the sole basis for regulatory disclosure, investor reporting, or financing decisions. All findings should be reviewed by a qualified EU Taxonomy practitioner before use; Censatim accepts no liability for

decisions taken in reliance on this document. To discuss the findings or commission a practitioner-reviewed assessment, contact consult@censatim.com.
